

RiskTrace Level-0 Data-Flow Diagram

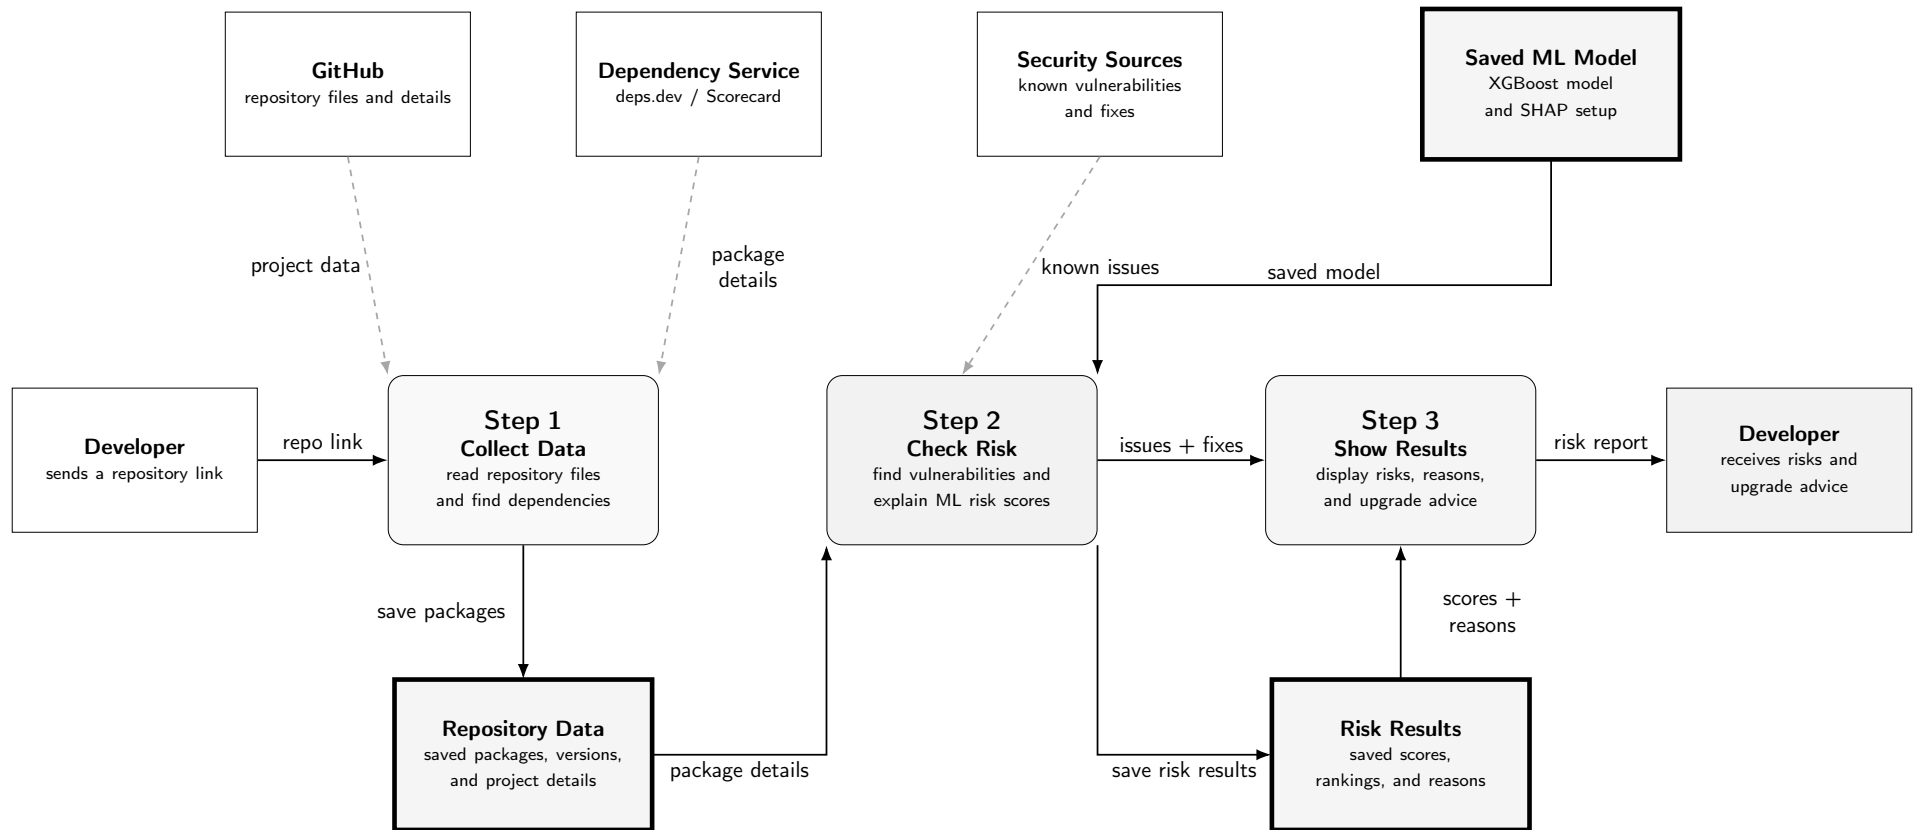

Overview: project data goes in, risk scores and advice come out

The same developer sends a repository and receives the results.

RiskTrace Level-1 Data-Flow Diagram

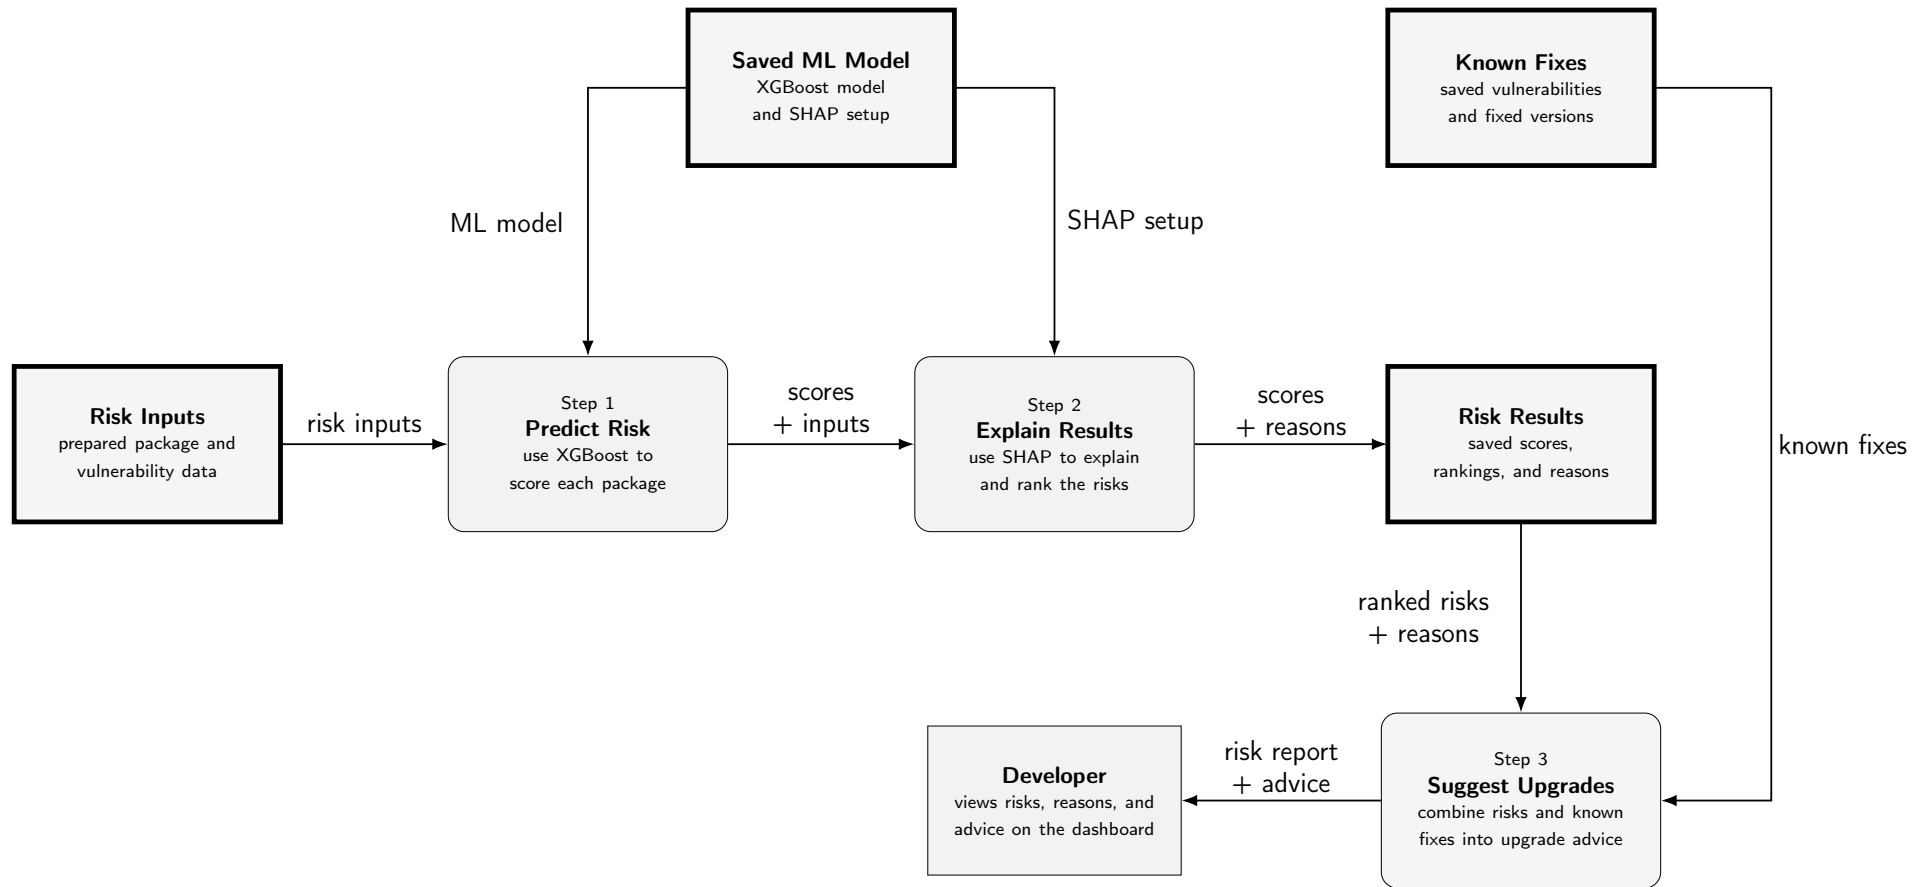

Three main steps: collect data, check risk, and show results

Level 2 focuses on the final risk-scoring, explanation, and upgrade-advice steps.

RiskTrace Level-2 Data-Flow Diagram

Final stages only: predict risk, explain results, and suggest upgrades

Repository collection and vulnerability checks happen before this focused view.
